

SHUBHAM KANPURE

MERN Stack Developer & AI Automation Engineer

8871148578 | shubhkanpure27@gmail.com | [linkedin.com/in/shubham-kanpure-702124233](https://www.linkedin.com/in/shubham-kanpure-702124233) | Indore, India

SKILLS

Web Development: React.js, Next.js, Node.js, Express.js, JavaScript, MongoDB, MySQL, HTML, CSS, UI Development

AI & Automation: OpenAI, Claude AI, VAPI, n8n, Prompt Engineering, LLM Integration, GoHighLevel (GHL) CRM, Twilio, Webhook Architecture, REST APIs

EXPERIENCE

MERN Stack Developer

IBR Infotech

01/2023 – Present | Indore, India

- Developed and maintained full-stack web applications using React.js, Next.js, Node.js, Express.js, and MongoDB across multiple client products.
- Built AI automation systems integrating OpenAI, Claude AI, VAPI, and n8n into client workflows, including voice-based recruitment, invoice processing, and property management communication platforms.
- Designed webhook-based middleware connecting AI agents with third-party CRMs and APIs such as GoHighLevel, Hospitable, Turno, and Holded.

PHP Developer (CodeIgniter)

Infinite Clicks Technologies

08/2022 – 01/2023 | Indore, India

- Developed and maintained web applications using PHP (CodeIgniter framework), contributing to backend logic, database design, and feature implementation.
- Collaborated with the development team to debug, test, and deploy client-facing applications.

EDUCATION

Bachelor of Commerce: Computer and Accounting

Harda Degree College, Barkatullah University, Bhopal, MP | 07/2014 – 05/2017

Master of Business Administration: Information Technology

Vindhya Institute of Technology and Science, DAVV, Indore, MP | 07/2019 – 05/2021

PROJECTS

Testuity — testuity.com

Tech Stack: React.js, Next.js, Node.js, JavaScript, MongoDB, HTML, CSS

Developed Testuity, an online IQ testing platform, building assessment modules for logical reasoning, pattern recognition, verbal understanding, and mathematical thinking.

Withzibi — withzibi-frontend.ibrcloud.com

Tech Stack: React.js, Node.js, JavaScript, MongoDB, HTML, CSS

Built Withzibi, a cognitive assessment web application delivering brain-health and memory evaluation tests to users.

Consumer Law — www.consumerlawdispute.ai

Tech Stack: React.js, Next.js, Node.js, MongoDB, HTML, CSS

Developed Consumer Law Dispute.ai, a credit-repair SaaS platform enabling users to generate and manage consumer dispute letters online.

Ortek — portal.ortek-shalwin.com

Tech Stack: *React.js, Node.js, MongoDB, HTML, CSS*

Built an inventory management system for Ortek to track stock levels, product details, and warehouse operations.

AI & AUTOMATION PROJECTS

AI-Powered Voice Recruitment Automation System

Tech Stack: *VAPI, GoHighLevel (GHL), OpenAI, Twilio, JavaScript, Prompt Engineering, Webhook Architecture, REST APIs, CRM Automation*

Built an end-to-end AI voice calling agent using VAPI integrated with GoHighLevel CRM via custom middleware. The system autonomously contacts leads, conducts structured qualification interviews through a scripted AI agent, evaluates candidate responses in real time, and triggers automated CRM actions including appointment booking or lead disqualification — streamlining recruitment pipelines for the insurance industry.

AI-Powered Invoice & Accounting Automation System

Tech Stack: *n8n, OpenAI, Google Sheets API, Gmail API, Google Drive API, Holded API, JavaScript, Prompt Engineering, PDF Data Extraction*

Designed and implemented an AI-driven automation system using OpenAI, n8n, Google Sheets, Gmail, Google Drive, and Holded APIs to automate invoice processing and accounting workflows — extracting and validating invoice data from emails and PDFs, matching suppliers/accounts, and creating purchase invoices automatically while handling multiple business edge cases.

AI-Powered Property Management & Guest Communication System

Tech Stack: *n8n, OpenAI, Claude AI, Twilio, Hospitable API, Turno API, Trello API, WhatsApp Business API, RingCentral, Prompt Engineering*

Built an end-to-end AI automation platform for Airbnb short-term rental operations covering AI guest communication, noise complaint protocol automation with multi-step WhatsApp security alerts, and operations reporting using Turno webhooks for real-time inventory/damage classification — auto-creating Trello cards and notifying managers via WhatsApp.
